EXAMINER'S AMENDMENT

An examiner's amendment to the record appears below. Should the changes and/or additions be unacceptable to applicant, an amendment may be filed as provided by 37 CFR 1.312. To ensure consideration of such an amendment, it MUST be submitted no later than the payment of the issue fee.

Authorization for this examiner's amendment was given in a telephone interview with John T. Kalnay on June 23, 2009 and again on July 1, 2009.

The application has been amended as follows:

1. (Currently Amended) A method, comprising:
 - receiving a first request in a data communications device from a client to access data;
 - providing a second request to access data to a data access device in response to receiving the first request, the second request including a heads up switching protocol which includes additional connection establishment information that enables establishment of a communication connection between the data access device and the client;
 - receiving a first response from the data access device in the data communications device in response to the second request, the first response including a heads up switching protocol; and

providing a data transfer approval to the data access device in response to receiving the first response, the data transfer approval authorizing the data access device to establish the communication connection to the client by bypassing the data communications device based on the connection establishment information and to provide a second response to the second request to the client by bypassing the data communications device through the communication connection established by the data access device as a result of the data transfer approval

11. (Currently Amended) A data communications device, comprising:

- a processor;
- a memory coupled to the processor; and
- a communications interface connected to the processor and the memory:
 - a first receive logic to receive a first request through the communications interface from a client to access data;
 - a request logic to provide a second request to access data through the communications interface to a data access device in response to receiving the first request, the second request including a heads up switching protocol which includes additional connection establishment information that enables establishment of a communication connection between the data access device and the client;

a second receive logic to receive a first response through the communications interface from the data access device, the first response including a heads up switching protocol; and

an approval logic to provide a data transfer approval through the communications interface to the data access device in response to receiving the first response, the data transfer approval authorizing the data access device to establish the communication connection to the client based, at least in part, on the connection establishment information and to provide a second response to the second request to the client.

The following is an examiner's statement of reasons for allowance: this communication warrants no examiner's reason for allowance, as applicant's reply makes evident the reason for allowance, satisfying the record as whole as required by rule 37 CFR 1.104(e). In this case, the substance of applicant's remarks filed on 11/19/08 as well as 4/14/09 with respect to the added claim limitation point out the reason claims are patentable over the prior art of record. Furthermore, Applicant agreed to further amend the claims to further distinguish over the prior art of record. Thus, the reason for allowance is in all probability evident from the record and no statement for examiner's reason for allowance is necessary (see MPEP 13202.14).

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

Any inquiry concerning this communication or earlier communications from the examiner should be directed to ALINA N. BOUTAH whose telephone number is (571)272-3908. The examiner can normally be reached on Monday-Friday (9:00 am - 5:00 pm).

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Tonia L.M. Dollinger can be reached on 571-272-4170. The fax phone number for the organization where this application or proceeding is assigned is 571-273-8300.
